Hunter's HANDBOOK[®]

2009 Sponsor Information

Official Student Publication of:
INTERNATIONAL HUNTER EDUCATION ASSOCIATION

18th Annual Edition

Profile & Purpose

In 1992, **Hunter's Handbook** made its debut in Hunter Education courses in all 50 states and Canadian provinces as a "How To" guide which takes the student beyond mandatory general safety guidelines, offering selection and use of a variety of hunting related products, with a special emphasis on safety in the field.

Hunter's Handbook is used as a collateral training tool in the classroom and covers a wide range of subject matter including archery, firearm cleaning, survival, footwear, reloading, black powder hunting, ammunition, optics and much more. These topics are covered in an interesting, graphically appealing, and educational editorial climate.

Hunter's Handbook was developed as the result of years of input from Hunter Education administrators and instructors to fill the need for expansion of the basic classroom curriculum.

The International Hunter Education Association endorses **Hunter's Handbook** as its only official student publication.

Hunter's Handbook benefits students who are given the opportunity to learn about products and techniques which assure immediate progress afield and awakens enthusiasm and desire to become actively involved in safe and responsible hunting activities.

Hunter's Handbook benefits instructors as an educational aid, bringing a broad base of information to students. The content of Hunter's Handbook serves to promote interesting classroom discussion on safety, tactics, product selection and fieldcraft.

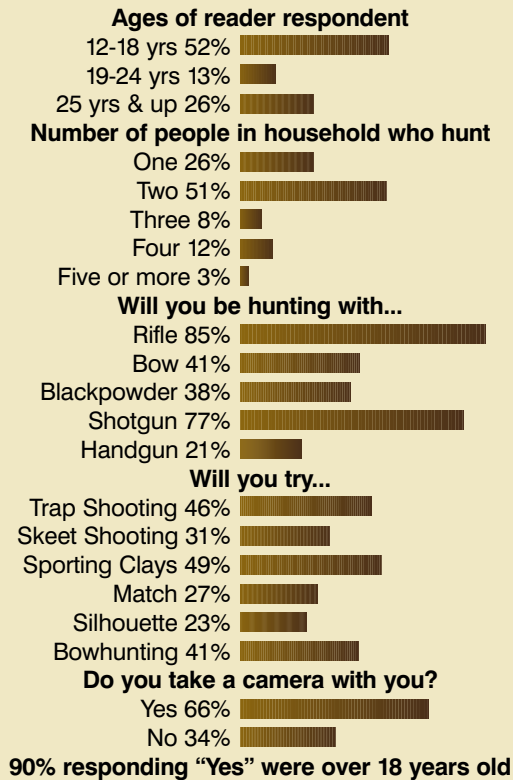

Hunter's Handbook benefits sponsors who have the opportunity to present products in a category-exclusive, educational format to over 750,000 new hunters in a classroom setting. Sponsors create brand preference by showing how their products will enhance hunting success.

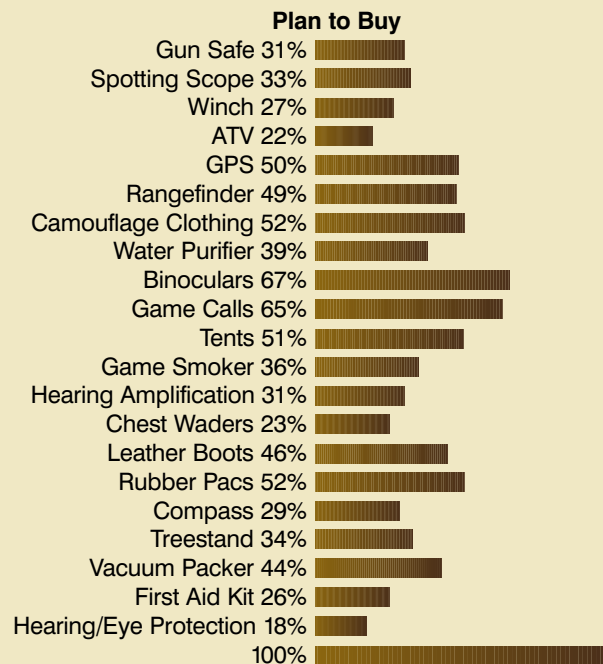

Reader Research

Since its inception in 1992, over 12,000,000 Hunter's Handbooks have been distributed through hunter education classes throughout North America. During that time, in excess of 500,000 completed questionnaires have been received from students and used to compile this detailed media guide.

The most outstanding statistic revealed from these questionnaires is student spending. Within 12 months after completing their courses, students, on average, will spend three times more than seasoned hunters on supplies as they gear up for the start of their hunting experience.

Product Ownership & Purchase Plans

Distribution

Distribution is handled through the same process as student and instructor manuals. This system has been utilized with the states for over 35 years and ensures smooth and effective distribution. It is a three part verification plan that 1) identifies original shipping date from printer to individual state authority, 2) verifies receipt of shipment at official state warehouse/distribution facilities, and 3) confirms presence/acceptance of **Hunter's Handbooks** with current state Hunter Education Administrator and his/her assigns.
